

COACHING TOOLS

Identify a Goal

CHANGE *What do you want to see?*

- I would like to improve my overall "teaching" skills - classroom management, active engagement, organization of lessons, and my overall comfortableness in the elementary classroom.
- I would like to see students more engaged and behaving in a classroom appropriate manner.

GOAL *What data will show you've met your goal?*

- Observations / tallies of students actively engaged vs. students not engaged and a number of behavior issues in the classroom over time.
- Observations of classroom management and active engagement strategies used effectively.
- My own observations and feelings about how comfortable I am in the elementary classroom.

STRATEGY *What strategy will you use?*

- I will work with Paula Cady to implement SLANT as a classroom management technique.
- I will watch Paula demonstrate active engagement strategies, classroom management, etc. Then I will work with Paula to co-teach and develop these skills for myself.
- I will make my own observations and gain insight from Paula's observations of me.

DATE *When will you meet your goal?*

- By the end of second semester
